What if venture capital drove the pursuit for good?

The SDG Catalyst is a 6-week Incubator that will develop, refine, and iterate growing startups' solutions to global challenges. Chosen startups will have or strive towards initiatives in one of our 4 Themes for the SDGs: managing the planet's resources, forging strong, peaceful, and just societies, adopting a zero-footprint future, and putting people first.

ai4good.org/sdg-catalyst

The program will take place virtually, where companies receive access to customized support and curated resources to help them rapidly address barriers, fill gaps, and progress towards funding milestones. Personalized support will include mentorship from SDG leaders, practitioners, and industry experts.

The SDG Catalyst, held from September to October 2022, will invite select startups to showcase to our community. These companies will have the exclusive opportunity to present their pitch to our selected VC firms.

What We Offer:

Direct access to all spin-offs and IP licensing opportunities

AI ethics reviews and audits for all portfolio companies (\$2,500 value each)

Seat on the AI For Good Executive Committee

Speaker slots, marketing, and outreach at the AI for Good Summit

Preferential tax treatment for capital contributions
